

ISO 26000 Self-declaration

Guichon Valves applies ISO 26000 guidance document for social responsibility.

There is no official certification for this standard.

Therefore, this document is a self-declaration of taking into account 7 aspects, in accordance with standard ISO 26000 and intrinsic to the notion of responsibility.

We have initiated this approach since January 2013.

We certify our compliance with these 7 principles.

First approval: September 1st, 2014.

In the context of the implementation of our commitments an action plan is deployed and ensures the sustainability of this approach.
